Too Sick For School?

So, what do you do when your child tells you they don’t feel well as they are about to leave for school in the morning? Please consider using the following guidelines when deciding to keep your child HOME:

- Temperature of over 100.0F-remember that Tylenol or Advil given within four hours of taking the temperature will mask the fever

- Persistent vomiting and/or diarrhea

- A severe cold with a fever, sneezing, thickened nasal discharge or persistent cough

- A persistent red sore throat, especially if the tonsils are enlarged

- Severe and ongoing earache

- Redness in the whites of eyes with yellow discharge and matted lashes are symptoms of conjunctivitis (pinkeye) and medical care is necessary as this is highly contagious

Two other reminders: - 6th grade parents please send in a copy of any physical your child has during this school year, so they can meet the requirements for 7th grade.

- If your child needs medicine during the school day please bring it in with a note. This policy and forms can be found on the school web site.
